

BACKGROUND

Company Overview

Agile Enterprise Services (AES) is an organization that streamlines and consolidates information and data across multiple geographically dispersed regions. We design and implement secure environments which have proven 58% less likely to be breached during 84 independent penetration events, that took place over the last year.

Since our founding, we've mapped a unique methodology which has allowed us to execute 1,800 task orders which still serve over 7,200 end users today. AES has over 9 years in business, strong financial backing, and a DCAA auditable accounting team in place. When you choose AES, we add value, with the risk of contracting with a small business already mitigated.

TECHNOLOGY AND SYSTEM INTEGRATION

Proposed Services
